## TAB Technician Apprentice

Are you a problem solver with a mechanical mind? Georgia Balance Inc. offers a successful career path for motivated and honest workers. We have an immediate need for an HVAC Testing, Adjusting and Balancing (TAB) Technician Apprentice. We are looking for an honest, energetic, and motivated individual who can perform well and learn in a fast-paced team-oriented environment.

### Job Description / Responsibilities:

- Learn how to diagnose, Test, Adjust and Balance system components to achieve optimal system performance
- Inspect systems to verify compliance with plans and specifications
- Read and interpret mechanical drawings, specifications, and equipment performance data to determine proper balancing techniques and project management approaches
- Prepare paperwork for field use from mechanical drawings, specifications provided by contractors
- Learn and execute all required NEBB and company standards and practices
- Establish effective working relationships with contractors, peers and sub-contractors

### Compensation

Competitive hourly rates with excellent benefits and matching 401(k), and great opportunities of advancement within the company.

### About You:

The successful candidate has a curious mind and is eager to understand and solve problems. The candidate is expected to work well in a team environment and learn from others. The apprentice must be able to multitask and prioritize their daily responsibilities, while adhering to our high standard of quality

### Personality Qualifications

- Self-motivated with a strong and honest work ethic
- Curious, problem solver, and result oriented
- Respectable and friendly personality
- Good organizational and communication skills
